Rt 7, Frederick, Md. 21701

2/21/68

Dear Md. Davidson,

Relet 2/19, since we met I have discussed your idea ice bullet with several experts all of whom disagree and say impossible for accurate shooting.

Kennedy's arms were not immobile. I believe his movements were natural, in response to the painful stimulus, and similar to how I have seen people less seriously hurt respond.

People are always getting hurt in the country.

Best regards,
